

## Power BI Training Program

Ever tried to organise a team training day? Project deliverables, last minute deadlines, and team commitments often make it impossible to agree a date. And yet, without investing in learning and development, the team may fall short of their potential.

CMBI designed their Power BI corporate training program for today's busy agile teams. We come to you. Train while everyone's fresh. Back to work before lunch!

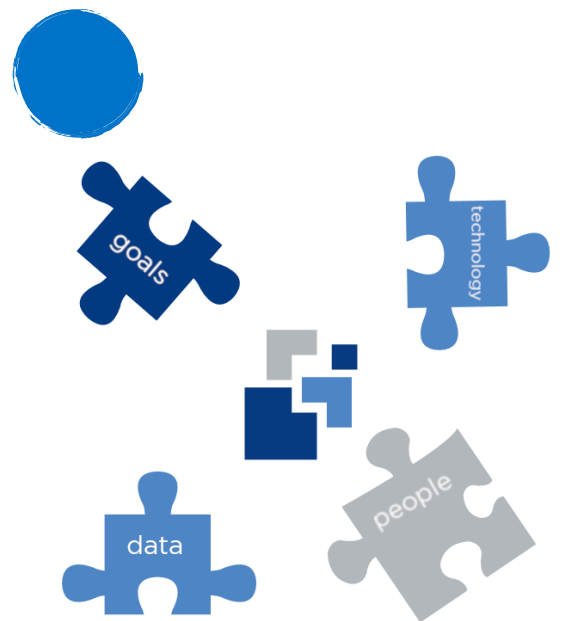

### How it works

**One session per week** covering the topics that are relevant to your team. Each session runs for **2 hours**, plus an optional **1 hour** for Q&A.

New skills. No travelling. No lost days!

Each session explores a different aspect of Power BI's comprehensive toolset. The short sessions maintain engagement with attendees and weekly intervals allow everyone to absorb and apply the concepts between sessions.

## Master Power BI without compromising deliverables with CMBI's Power BI Corporate Training Program.
